

Anti-weed Pot Covers

TESTED PRODUCT. GUARANTEED EFFICIENCY

UNE-EN ISO 14067 Certification: Our products have up to 41% less carbon footprint compared to products imported.

FEATURES

- Material: 100% Polypropylene Thermally Bonded Spunbond Nonwoven with UV protection.
- Weight: 100 and 110 gsm.
- Mechanically and chemically resistant.
- Breathable.
- Dimensions: as needed.
- Other treatments and colours: upon request.
- UV radiation resistance: with the possibility of increased UV addition according to your needs.
- Please check for other treatments and colours.

BENEFITS

We offer an optimal and reliable solution to maximize the yield and quality of your crops, while ensuring biological protection and thermal control of crops, which is environmentally friendly and compatible with organic farming.

- Elimination of weed growth and maintenance of humidity in pots.
- Adaptation to different pot models and sizes. Customized production.
- It facilitates water absorption.
- Good air permeability and plant transpiration.
- Increased plant comfort: it generates optimal temperature and comfort.

- Our flexible fabric provides the perfect protection for plants.
- Savings in herbicide and irrigation costs.
- It protects the crop from solar radiation and adverse weather conditions.
- Easy to handle and position for quick and easy installation.
- 100% recyclable and low landscape impact.

APPLICATION

Ideal product for nurseries in general and especially for the production of slow-growing plants, such as avocado, mango, custard apple, olive, almond, pistachio and woody plants in general.
It prevents grass growth, which means savings in the cost of manual grass removal in nurseries.

DURABILITY AND STORAGE

- It maintains more than 50% of its mechanical properties after 5 years subjected to high solar radiation exposure (accelerated aging chamber test).
- It must be stored in a dry environment, at a temperature below 50°C and protected from UV radiation. In unsuitable conditions, degradation processes may begin.
