

**SPECIFIC CONDITIONS FOR “DNT AGRO” PRODUCTS OF DNT NON WOVEN FABRICS,
S.A.**

The products marketed under the **DNT AGRO** line have specific technical characteristics that require proper use, installation, handling, removal, and storage in accordance with the instructions provided by **DNT Non Woven Fabrics**.

These Specific Conditions shall take precedence over the General Terms of Sale in all matters relating to these products.

The customer expressly declares to be aware of and to accept these Specific Conditions at the time of purchase of any product of DNT AGRO:

1. Improper placement, installation, removal, and storage of the product, including direct exposure to sunlight without protection when not in use, affect its performance and lifespan.
2. Mechanical unwinding without supervision or proper control is expressly discouraged, and any damage resulting from such procedure shall be the sole responsibility of the customer.
3. Continuous exposure of the product to friction with rough or sharp surfaces may cause localized wear or breakage, which shall not be considered a manufacturing defect nor attributable to DNT Non Woven Fabrics.
4. Agricultural activities such as harvesting, clearing, or other mechanical tasks carried out near the product may cause localized wear or breakage, without this being considered a defect of the product.
5. Exposure of the product to extreme weather conditions such as temperatures above 50° or below 5°, as well as extreme wind conditions, may compromise the integrity of the material, affecting its performance and lifespan.
6. Phytosanitary products or incompatible chemical agents (such as chlorine, sulfur, or other aggressive compounds) must not be applied, as they may affect the product's performance beyond the limits established in the technical data sheet. Claims or returns will not be accepted for material showing traces of chemical agents —such as halogens, sulfur, iron, or their derivatives— exceeding the values specified in the technical data sheet.

Failure by the customer to comply with these Specific Conditions, as well as with the instructions for use and technical recommendations provided by DNT Non Woven Fabrics, releases the latter from any liability for defects, damage, deterioration, or malfunction of the product, and expressly excludes any claim, return, or liability on the part of DNT Non Woven Fabrics.
